Education

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar Expected 2027
B.Tech in Computer Science Engineering *CGPA: 8.54/10*

Skills

Languages: Python, C, SQL, JavaScript, HTML, CSS
Data Science: Data Cleaning, Data Analysis, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis
Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Databases: MySQL
Tools: Git, GitHub, Jupyter Notebook, VS Code

Projects

RoomHunt | *HTML, CSS, JavaScript, Node.js, Database, Git*

- Developing a room rental and discovery platform designed to help users find available rooms based on location and search preferences.
- Implemented features for property owners to list room details including rent, capacity, parking availability, and guest policies.
- Designed functionality for users to search nearby rooms, communicate with owners, share contact details, and schedule property visits.

School Uniform Detection System | *Python, TensorFlow, Keras, OpenCV*

- Built a computer vision system to classify whether a student is wearing a school uniform or not.
- Prepared and cleaned image datasets and implemented preprocessing and data augmentation techniques.
- Integrated the trained model with OpenCV for real-time webcam-based detection and alert functionality.

Hostel Management System | *PHP, MySQL, HTML, CSS, JavaScript*

- Developed a web-based hostel management system for organizing student and hostel-related information.
- Designed and managed database functionality using MySQL and implemented backend operations using PHP.
- Created an interactive interface to manage and organize records efficiently.

Oasis Secondary School Website | *HTML, CSS, JavaScript, PHP, MySQL*

- Developed a responsive website for a school to present institutional information and improve online accessibility.
- Designed user-friendly web pages and implemented interactive frontend functionality.
- Worked with web technologies and database integration for managing website content.

Experience

Data Science Intern | *Intern* Present

- Gaining practical experience in data analysis, data processing, and data science workflows.
- Working with Python and data analysis libraries to clean, analyze, and interpret datasets.
- Applying exploratory data analysis and visualization techniques to support data-driven decision making.

Certifications

Data Analyst Certification
Economics of Health and Science Certification

Relevant Coursework

Data Structures and Algorithms • Database Management Systems • Probability and Statistics • Machine Learning • Data Analytics • Object-Oriented Programming
